### **Info Security Products Guide Names Kazeon Winner of the 2007 Tomorrow's Technology Today Award**

#### **Kazeon Information Server IS1200-ECS Named One of the Top Security Solutions for Healthcare**

**Mountain View, CA — August 16, 2007 — Kazeon**, a leading provider of enterprise information access solutions, announced today that Info Security Products Guide, a Silicon Valley Communications publication and the world's leading publication on security-related products and technologies, has named Kazeon's Information Server IS1200-ECS a winner of the 2007 Tomorrow's Technology Today Award. This prestigious award recognizes security vendors with advanced, ground-breaking network security solutions that are helping set the bar higher for others in all areas of information security. The IS1200-ECS was selected by the editors of Info Security Products Guide based on technologies that are making the most positive impact on security in today's highly sophisticated and blended attacks environment.

To help healthcare organizations meet the growing challenges of eDiscovery and manage electronically stored information, the IS1200-ECS ensures information residing on desktops, networked storage systems and devices (scanners, film digitizers, etc) can be discovered, searched and managed in order to improve productivity, decrease risk and increase regulatory compliance. Kazeon also provides integrated support for the DICOM standard, which enables healthcare providers to discover, search and manage files based on one or many DICOM file attributes. The IS1200-ECS integrates into existing healthcare provider networks and interfaces with existing networked storage and servers to search, classify and act on files in hundreds of file formats and all files that comply with the DICOM standard.

Kazeon helps healthcare providers by providing a complete solution for Healthcare IT environments. For more information on the Kazeon IS1200-ECS, please visit:

"Companies that have been honoured with the prestigious 2007 Tomorrow's Technology Today award have each made deep-rooted commitment to solving security issues," says Rake Narang, editor-in-chief, Info Security Products Guide. "Probably nothing differentiates a product or solution more than the superior technologies behind it making them suitable for today's needs while pro-actively being ready for tomorrow too."

"Healthcare organizations are challenged by rigorous eDiscovery, regulatory compliance and governance requirements," said Sudhakar Muddu, CEO of Kazeon. "The Kazeon Information Server IS1200-ECS makes it easier for these organizations to increase regulatory compliance and decrease risk. Complying with the DICOM standard is an extra step that Kazeon has taken to improve the IS1200-ECS to help better manage and protect patient information."

**About Info Security Products Guide Awards**

Info Security Products Guide, a founding member of the Technology Industry Leadership Council sponsors leading conferences and expos worldwide and plays a vital role in keeping end-users informed of the choices they can make when it comes to protecting their digital resources. It is written expressly for those who are adamant on staying informed of security threats and the preventive measure they can take. You will discover a wealth of information in this guide including tomorrow's technology today, best deployment scenarios, people and technologies shaping info security and independent product evaluations that facilitate in making the most pertinent security decisions. The Info Security Products Guide Awards recognize and honor excellence in all areas of information security.
