

Kazeon Information Server Wins Network Products Guide Reader Trust Award for Best in Enterprise Content Management

Kazeon's Information Access & Management Platform Selected a 2008 Best Products and Services Winner

Mountain View, Calif. – August 5, 2008 – Kazeon Systems, Inc. announced today that Network Products Guide, a Silicon Valley Communications publication and a world leading publication on technologies and solutions has named the Kazeon Information Server a winner of the 2008 Best Products and Services Award. This respected annual award honors products and services that represent the rapidly changing needs and interests of the end-users of technology worldwide. As part of the tech-industry's leading global awards program, this year's Best Products and Services were nominated from all over the world.

Kazeon is excited to be recognized as a best product by Network Products Guide. This is a testament to Kazeon's unique and revolutionary approach to solving the Information Access & Management problem without requiring information to be migrated to a central repository. The award winning and proven Information Access & Management Platform provides the capabilities to manage enterprise-wide information in a thorough, scalable, high performing and cost effective manner. The platform has four key fundamental technologies: a discovery engine, a search index engine, a classification engine and an action workflow engine. It can process information across the enterprise (data centers, remote offices, laptops/desktops) and across various data sources such as unstructured data, semi-structured data and structured/application data. Kazeon's platform contains applications built on it to provide strong capabilities for proactive and reactive Information access & Management - this can be done at a project or department level, or as a fundamental IT infrastructure across the enterprise to solve a wide range of customer challenges in the areas of eDiscovery, Information Security & Privacy, Governance, Risk & Compliance, and Data management.

"Increased end-user awareness and ongoing advances in technology are helping shape better products and services." says Rake Narang, editor-in-chief, Network Products Guide. "Kazeon's Information Server is bringing significant improvements in both functionality and cost to an already crowded Information Access & Management market."

“These awards go to the best technology products every year and we are honored that the Kazeon Information Server has gained the Network Products Guide Reader Trust.” Sudhakar Muddu, CEO of Kazeon Systems said. “The recognition of Kazeon’s Information Server as a top product by Network Products Guide is a great testament to Kazeon’s leadership presence in the Information Access & Management space.”

About Network Products Guide Awards

Network Products Guide, published from the heart of Silicon Valley, is a leading provider of products, technologies and vendor related research and analysis. About Kazeon

Kazeon revolutionizes the way companies perform eDiscovery by using the Kazeon Information Access Platform software to intelligently discover, search, classify and act on electronically stored information. Kazeon provides a full spectrum of proactive and reactive eDiscovery solutions in response to litigation, information security and privacy, corporate investigations, regulatory compliance and storage consolidation requirements. The Kazeon Information Server software automates eDiscovery functions from identification, collection through processing, preservation, analysis and review for corporations, service providers, and law firms. Through the development of unique search, indexing, analysis and workflow automation technology, Kazeon has established partnerships with leading companies, including Fujitsu Siemens, Google, Network Appliance, Oracle and Symantec. Kazeon's award-winning products are helping an increasing number of companies to significantly reduce the risk, duration and cost of eDiscovery matters while increasing visibility and control over electronically stored information. Kazeon provides the industry's highest scalability and performance capability of more than 17 terabytes (TB) of data per day, while offering the lowest cost, \$4.30 per Gigabyte.
