Array Technology Group and Kazeon Join Forces for eDiscovery Analytics

Joint Solution Provides Powerful and Defensible Processing & Analytics for Early Case Assessments

Mountain View, Calif. --- August 18, 2008 --- Kazeon Systems, Inc., a leading provider of intelligent eDiscovery solutions, today announced a reseller partnership with Array Technology Group LLC, a leader in litigation support counseling, software training, trial preparation and eDiscovery since 1984. Kazeon's Information Access Platform will be used by Array's customers to intelligently Discover, Search, Classify and take Workflow Action upon all their electronically stored information (ESI). Kazeon's technology streamlines eDiscovery tasks including early case assessment, analytics, processing and legal hold of ESI – greatly reducing the overall cost and risk associated with legal discovery while helping organizations comply with corporate and governmental mandates.

Legal preparedness and FRCP requirements have forced legal professionals to shorten the time it takes to produce relevant information for eDiscovery and to identify relevant and sensitive data residing on a company's network. Array's customers are now able to perform processing and analytics across large volumes of ESI across the enterprise and across various data sources, including desktops, email and PST content in an integrated manner, thus greatly minimizing risk and mitigating future litigation costs. Additionally, in those instances where litigation is imminent, the allows Array's clients to quickly and efficiently meet their duty to preserve, thereby realizing substantial savings in the cost of collection, filtering and production.

The Kazeon Information Access Platform streamlines the eDiscovery process by identifying relevant and sensitive data residing on a company's network. Kazeon's Information Access Platform can crawl through a company's entire network and work station environment, including laptops, remote offices, desktops, emails and PST content. Paired with the expert litigation services of Array Technology Group, lawyers are now able to proactively perform these activities to create a defensible and repeatable approach toward litigation preparations and procedures. Using Kazeon's technologies, Array's litigation consultants can fully automate in-house eDiscovery functions, from collection through processing, analysis and review.

"We are excited to announce the Kazeon partnership to drive efficient eDiscovery analytics and processing for early case assessment," said Scott Fischer, founding partner of Array Technology Group. "The joint solution provides the most cost-effective option for our customers while eliminating risks in the entire eDiscovery process."

"Array and Kazeon now provide comprehensive, end-to-end proactive as well as reactive eDiscovery solutions for their customers." said Karthik Kannan, vice president of marketing and business development at Kazeon. "The joint solution provides exceptionally strong analytics and processing capabilities for early case assessments, thus providing our customers with the most transparent and defensible solution for their eDiscovery needs."

About Kazeon

Kazeon revolutionizes the way companies perform eDiscovery by using the Kazeon Information Access Platform software to intelligently discover, search & index, classify and act on electronically stored information. Kazeon provides a full spectrum of proactive and reactive eDiscovery solutions in response to litigation, information security and privacy, corporate investigations, regulatory compliance and storage consolidation requirements. The Kazeon Information Server software automates eDiscovery functions from identification, collection through processing, preservation, analysis and review for corporations, service providers, and law firms. Through the development of unique search & indexing, analysis and workflow automation technology, Kazeon has established partnerships with leading companies, including Fujitsu, Siemens, Google, Network Appliance, Oracle and Symantec. Kazeon's award-winning products are helping an increasing number of companies to significantly reduce the risk, duration and cost of eDiscovery matters while increasing visibility and control over electronically stored information. Kazeon provides the industry's highest scalability and performance capability of more than 17 terabytes (TB) of data per day, while offering the lowest cost, \$4.30 per Gigabyte.
