## **Wageworks chooses Kazeon for solving Information Management Challenges**

**Mountain View, Calif. --- September 30, 2008 ---** Kazeon Systems, Inc., a leading provider of intelligent Information Management solutions, has been selected by Wageworks to proactively address Information management challenges. Kazeon's Information Management solutions are focused on solving key enterprise challenges in the areas of eDiscovery, Records Management, Information Security & Privacy, Governance, Risk & Compliance, and Data Management. Wagesworks is a leading provider of tax-advantaged benefits for families and corporations, for enterprise-wide management of information.

Kazeon provides enterprise-wide management of data residing across different content repositories, active or archive, and across servers, storage systems, laptops and desktops. This capability is critical in helping organizations streamline Information Management both proactively and reactively. Proactive and reactive Information Management can be initiated at a small scale, such as a departmental deployment, and can expand to larger or enterprise-wide scales over time.

Kazeon's award-winning flagship product, the Information Server, provides superior in-place analysis and review capabilities for Information Management and eDiscovery. Kazeon's agent-less, in-place analysis and review capabilities ensure that all relevant and necessary information flows through the Information Server's discovery, search, classification and action workflow functions. The Information Server takes a unique approach to Information Management across large enterprise environments without requiring any overhead of moving or copying data into other repositories. These industry-leading capabilities provide extensive protection of data and logging of actions, and ensure no spoliation of data or modifications to metadata attributes of files and emails, while saving significantly on network bandwidth and cost. Kazeon's Information Server continues to set the standard in addressing the most sophisticated Information Management and eDiscovery requirements of organizations worldwide.

### **About Kazeon**

Kazeon revolutionizes the way companies perform Information Management and eDiscovery by using the Information Server software to intelligently discover, search & index, classify and act on all electronically stored information. Kazeon provides a full spectrum of Information Management solutions, including proactive and reactive eDiscovery, information security and privacy, records management, governance, risk & compliance, and data management. The Kazeon Information Server software automates key eDiscovery functions – identification, collection, preservation, processing, analysis and review for corporations, service providers, and law firms. Kazeon provides unique in-place legal analysis, review and workflow automation technology as well as legal hold for retaining data in original state. Kazeon has been recognized by various industry forums, including Gartner's eDiscovery MarketScope where Kazeon was rated 'Positive' and the Socha-Gelbmann eDiscovery Survey 2008 where Kazeon was recognized as a Top 5 eDiscovery Software Provider. Kazeon has established partnerships with leading

companies, including Fujitsu-Siemens, Google, Network Appliance, Oracle and Symantec. Kazeon provides the industry's highest scalability and performance, more than 17 terabytes (TB) of data per day, while offering the lowest cost, \$4.30 per Gigabyte.
