## **Kazeon Extends eDiscovery Analysis & Review Functionality**

*Kazeon proves its End-to-end eDiscovery Capabilities through Analysis & Review Advancements*

**Mountain View, Calif. --- February 17, 2008 ---** [Kazeon Systems](#), Inc., a leading provider of intelligent eDiscovery solutions, announced the extension of their in-house eDiscovery platform for enterprise customers in the areas of eDiscovery analysis, content analytics, first-pass review and in-house review capabilities, further cementing their leadership in the eDiscovery software market. [Kazeon's unique end-to-end eDiscovery](#) capabilities have been [validated](#) by enterprise customers, industry analysts and legal discovery service providers alike, and provide the best solution to fulfill all in-house eDiscovery needs.

Kazeon's pioneering in-house and in-place [analysis and review](#), and early case assessment functionality provide global enterprises with offices across different countries or many locations without data being transferred outside the enterprise or country. Kazeon's highly scalable, distributed and collaborative analysis and review platform handles small or large legal cases, allowing multiple reviewers, such as in-house legal professionals, law firms and external reviewers, to collaborate in a high throughput fashion.

By leveraging these capabilities, enterprise customers can significantly reduce costs because documents are not required to be sent outside the enterprise, thereby eliminating any hidden costs involved in migrating the data and in external hosting.

"Kazeon's focus on key enterprise use cases such as end-to-end eDiscovery, Analysis & Review, [Early Case Assessments](#) and first-pass review have resulted in their development of innovative and revolutionary in-house eDiscovery capabilities," said Arun Taneja, Taneja Group. "Their unique ability to perform all key functions across the EDRM framework positions them as a strong, leading eDiscovery software vendor."

Kazeon's eDiscovery software provides the following key analysis & review benefits to customers:

- Interactive [culling](#), analysis, tagging and review;
- Email (Microsoft Exchange, IBM Lotus, Symantec Email Archive) threading and analytics;
- Content and metadata Analysis across ESI sources, custodians, senders, recipients, domains, data ranges, document types, etc.;
- Accurate, transparent and complete search results analytics and comprehensive analytic reports;
- Integration of Legal hold with Analysis and Review in an interactive manner.

“Kazeon’s innovative, end-to-end eDiscovery capabilities are exactly what customers need as they bring eDiscovery in-house,” said Karthik Kannan, Kazeon’s VP of Marketing. “Corporations like [Subaru \(Subaru of America, Inc. Selects Kazeon to Solve In-house eDiscovery Challenges\)](#) are leveraging Kazeon’s full functionality eDiscovery software to fulfill their in-house enterprise eDiscovery needs while keeping their costs and risks extremely low.”

## **About Kazeon**

Kazeon revolutionizes the way companies perform Information Management and eDiscovery by using the Information Server software to intelligently discover, search & index, classify and act on all electronically stored information. Kazeon provides a full spectrum of Information Management solutions, including proactive and reactive eDiscovery, information security and privacy, records management, governance, risk & compliance, and data management. The Kazeon Information Server software automates key eDiscovery functions – identification, collection, preservation, processing, analysis and review for corporations, service providers, and law firms. Kazeon provides unique in-place legal analysis, review and workflow automation technology as well as legal hold for retaining data in original state. Kazeon has been recognized by various industry forums, including Gartner’s eDiscovery MarketScope where Kazeon was rated ‘Positive’ and the Socha-Gelbmann eDiscovery Survey 2008 where Kazeon was recognized as a Top 5 eDiscovery Software Provider. Kazeon has established partnerships with leading companies, including Fujitsu-Siemens, Google, Network Appliance, Oracle and Symantec. Kazeon provides the industry’s highest scalability and performance, more than 17 terabytes (TB) of data per day, while offering the lowest cost, \$4.30 per Gigabyte.
